CV Services Group

delivering the edge

ELECTRICAL
CONSTRUCTION

Expert solutions. Exceptional service.

COMPLETE SOLUTION

With over 30 years' experience, the Electrical Construction team delivers quality electrical design and construct services to a diverse range of commercial, industrial, government and residential sectors. As one of the largest businesses of its kind in Queensland, the team has grown to provide services to our valued clients across multiple state-wide locations.

With experience across industrial, commercial, multi-level residential and project housing our clients can have complete confidence in our electrical design, construct and installation skills. Our team has a well-earned reputation for service excellence, quality of work and a total commitment to our customers. This commitment extends across our capability to deliver on the biggest projects and still focus on the smallest details.

Committed to delivering you the edge by always:

- putting safety first
- understanding and respecting your priorities
- communicating openly to ensure there are no surprises; and
- delivering quality outcomes

CONSTRUCTION

Developers and builders can access a complete electrical construction solution, including electrical design and certification, installation of projects from concept planning, through to design and building approval, construction and completion.

To a variety of customers in the industrial and commercial sectors we deliver;

- reticulated electrical infrastructure works
- general and specialised power installations
- full internal and external lighting installation
- communications and data
- security systems
- access control and
- MATV solutions

With experience across a broad range of industrial, commercial, multi level residential projects, aged care and education sector our knowledge and expertise ensures the highest level of quality in execution and delivery. Having an in depth understanding of construction operations allows us to ensure all electrical aspects can be delivered in time with strict schedules and tailored to specific customer needs.

HOUSING

Our project housing customers enjoy a full range of electrical installation services including;

- design and drawing works
- full internal and external lighting and house wiring
- air conditioning install
- complete solar service
- home automation and
- electrical maintenance needs

Completing over 800 homes per year, the Electrical Construction housing team has proven systems and processes as a result of broad experience and continued evolution. Our electrical contractors are equipped with the skills to ensure ease and efficiency across all projects and exceeding the expectations on quality and delivery.

Our team has the capability to seamlessly integrate into your housing program to deliver on time, every time. The knowledge base of our housing team comes from long term successful relationships with respected project builders; Metricon, Dwyer Quality Homes, Integral Homes, Ausmar and many more.
